

*2018 NCFL Grand Nationals*  
*Washington D.C.*

*Special Announcement*

*Electrical Outlets for Debate*

We are pleased to announce that all the cubicles on the Convention Center Exhibit Hall Floor for Policy, Public Forum, and Lincoln-Douglas Debate will have power available in them. Each cubicle will have 2 standard power plugs.

- To accommodate all debaters and judges in each cubicle, each Policy & PF debate team should bring a power strip with at least 5 sockets on it, and each LD Debater should bring a power strip with at least 4 sockets on it. If a team does not bring a power strip, then they are not allowed to plug in at all.
- Debaters and judges who expect to plug into the power strips should bring their own adapters and extension cords. Please bring extension cords because we cannot rearrange the furniture in the cubicles. Due to the power restrictions we are not allowed to plug in more than 7 laptops in any cubicle at any one time.
- The tournament will not supply power strips or extension cords. Bring your own!

Thank you to the donors who have made contributions to help make this possible.
